The ROBERTS® 10-128 Locking Pattern Matching and Seam Repair Stretcher was designed to quickly and accurately match patterns during carpet installation and repair. This stretcher may also be used to correct bowing and skewing in new carpet, and for stretching in small areas. Measuring less than 2 ft. long, this stretcher is compact and easy to maneuver in the room. Constructed of die-cast aluminum, the 10-128 holds up to 300 lbs. of stretch tension. This stretcher includes a removable powerhead, tailblade attachment and an automatic locking feature.
