Pro Comfort Knee Pads

IMPROVED
25% increase in strap length to fit thin or thick legs

PROTECTION
Extra-wide padded upper strap lessens impact during knee kicking

STABILIZING
Heavy-duty foam padding conforms to knees, providing stability while kneeling

CONVENIENT
Bottom strap has a pull loop to help installer get secure fit and quick release

COMFORTABLE
Premium-grade neoprene is comfortable, washable, and won't pinch the skin

VERSATILE
Integrated loops accommodate carpenter pencils, pens and row finders

ROBERTS® Pro Comfort Knee Pads are specifically designed for flooring installation. Featuring premium-grade neoprene and soft, non-pinching wide straps, these knee pads safeguard against impact to the knees, protect the knee caps, and provide cushioning for more comfortable kneeling. The upper padded strap, now 25% longer for improved fit and comfort, is specifically designed for use during knee kicking. Whether the flooring installation requires extended kneeling time like in a large commercial project, or short kneeling time during smaller residential projects, these knee pads create a comfortable barrier between the knees and the flooring surface.
