The ROBERTS® Gel Pro Carpet Knee Kicker makes carpet stretching easier than with conventional kickers. The bumper features a Gel Core, mounted at a 5° angle, that reduces knee shock for more comfort while providing optimum driving impact. Constructed of steel and aluminum for durability, this knee kicker features a padded handle with a thicker grip to eliminate hand strain. The 30% thicker and 30% wider bull neck design transfers more force to move the carpet forward more efficiently, resulting in fewer kicks.
