The ideal power stretcher for the professional installer, the ROBERTS® Falcon™ features the widest tailblock in the industry (up to 44" with extensions), making it the only stretcher capable of stretching across a door jamb. Like its predecessor Power-Lok, the ROBERTS Falcon includes a swivel head (securing in 5 different stretch positions), low-profile head and side kicker platform for use with a knee kicker, and adjustable pin-depth penetrations to ensure compatibility with all carpet thicknesses. Installer preferred upgrades include metal plate with incorporated handle for improved repositioning, and a quick-lock button on handle for locking the stretcher in place.
